TOLKIENS SCRIPTS

These scripts were invented by J. R. R. Tolkien and appear in his novels *The Hobbit*, *The Lord of the Rings* and *The Silmarillion*. Tolkien's Tengwar script was originally designed to write the Elvish languages Quenya and Sindarin, but has been adapted to write quite a few other languages.

Het Hebreeuws wordt van rechts naar links geschreven, in plaats van het Nederlands dat van links naar rechts geschreven wordt.

Het Hebreeuwse alfabet heeft geen klinkers.

Het Hebreeuws heeft een alfabetisch getal systeem: dit systeem kent geen symbol voor nul, en de letterwaarde van de individuele letters worden opgeteld. Elk cijfer (1, 2, ..., 9) wordt weergegeven door een aparte letter, elk tiental (10, 20, ..., 90) door een aparte letter, en elk honderdtal (100, 200, ..., 900) een aparte letter.

Dit systeem van Hebreeuwse cijfers wordt vooral gebruikt in het oudere Hebreeuws. In het modern Hebreeuws maakt men meestal gebruik van cijfers uit het decimale systeem.

Het additieve karakter van het systeem kan worden geïllustreerd aan het voorbeeld voor het getal 177, dat kan worden weergegeven als טזׁ wat overeenkomt met $100 + 70 + 7 = 177$.

De getallen 15 en 16 worden weergegeven als respectievelijk טוׁ (=9+6) en טזׁ (=9+7), in plaats van ה' ו' en י' . De laatste, meer voor de hand liggende combinatie wordt niet gebruikt om een letterreeks te vermijden die deel uitmaakt van de naam van God volgens het jodendom.

1 2 3 4 5 6 7 8 9 10 11 12 13

A point placed within each gives thirteen more, thus :

ج **ه** **ل** **ك** **و** **س** **ر** **م** **ف** **ي** **أ** > <
1 2 3 4 5 6 7 8 9 10 11 12 13

Making a total of twenty-six, equal to the number of letters in the English alphabet.

There are two ways, at least, of combining and using these characters for the purposes of secret correspondence. One method is to call the first sign, **ج** a; the same, with a point, **ه** b, etc. Another is to apply them, in their regular course, to the first half of the alphabet, **ج** a, **ه** b, and so on. to m; after which, repeat them with a dot, beginning with **ن** n, **ل** o, etc., to **أ** z.

The alphabet, according to the first method, stands thus :

ج **ه** **ل** **ك** **و** **س** **ر** **م** **ف** **ي** **أ**
a b c d e f g h i j k l m

ر **م** **ن** **ف** **ي** **أ** **ل** **ك** **و** **س** > > < <
n o p q r s t u v w x y z

According to the second method, thus :

ج **ه** **ل** **ك** **و** **س** **ر** **م** **ف** **ي** **أ** > <
a b c d e f g h i j k l m

ج **ه** **ل** **ك** **و** **س** **ر** **م** **ف** **ي** **أ** > <
